PROFESSIONAL SUMMARY

Final-year Computer Engineering student with hands-on frontend development experience in React and JavaScript. Currently working as a MERN Stack Developer Intern at Enlighten Infosystem, building SafeHer, a real-time women safety platform, while developing backend skills through applied project work. Strong communication and problem-solving skills with a CGPA of 9.65.

SKILLS

Front-End: HTML, CSS, JavaScript, React
Programming Languages: Python, C
AI & Cloud: IBM Watsonx.ai, IBM Granite, IBM Cloud
Tools: Git, GitHub, VS Code
CS Fundamentals: Data Structures, DBMS, Computer Networks

WORK EXPERIENCE

MERN Stack Developer Intern — Enlighten Infosystem - Present *July 2026 | Vadodara, Gujarat*

- Building SafeHer, a real-time women safety platform, with hands-on frontend development (React) and assisting with backend integration across Express.js, MongoDB, and Node.js in a live development environment.
- Supporting system design, API structuring, and feature implementation as part of a production-style development workflow.

AI & Cloud Technologies Intern — Edunet Foundation (AICTE) *Jul 2025 – Aug 2025 | Remote*

- Completed a 4-week internship in AI and Cloud technologies under Edunet foundation and AICTE and worked with IBM SkillsBuild and IBM Cloud Platform to develop practical understanding of cloud deployment and AI integration.
- Getting hands-on experience with how conversational AI is built, tested, and shipped rather than just studied in theory.

PROJECTS

SafeHer — Real-Time Women Safety Platform (MERN) [In Progress]

- A community women safety platform enabling users to trigger real-time SOS alerts, report unsafe areas, and connect with verified nearby volunteers.
- Designed around 3 user roles (citizen, volunteer, admin) with geolocation-based volunteer matching and incident moderation.
- Planned architecture: MongoDB for data modeling, REST APIs, and Socket.io for real-time SOS alert delivery.
- Currently building the authentication system and core SOS trigger flow.

Digital Finance Literacy Agent — IBM SkillsBuild Capstone Project

- Built an AI agent using IBM Watsonx.ai to educate users on UPI safety, loans, budgeting, and fraud awareness, in English and Hindi.
- Designed the agent using a ReAct + LangGraph architecture on IBM Granite/Mistral-Large models, with document retrieval and prompt tooling for grounded responses.
- Deployed and tested the agent on IBM Cloud, successfully handling real multilingual queries.
- Stack: IBM Watsonx.ai, IBM Granite, LangGraph, IBM Cloud.

EDUCATION

Sigma Institute of Engineering and Technology, Vadodara *Aug 2023 – Present*

- Bachelor of Technology in Computer Engineering — CGPA: 9.65

CERTIFICATIONS

- Code Unnati Advance Course — Edunet Foundation | Code Unnati (SAP), 2025–2026
- Front-End Development Fundamentals — Infosys Springboard, Jul 2025
- Python Skill Up — GeeksforGeeks
- TCS iON Career Edge – Young Professional, Aug 2025

ACHIEVEMENTS

- SAP Code Unnati Innovation Marathon 2025–26 — Contributed frontend design and led team presentations for "Assistive Vision," advancing to the national top 20 out of 350+ teams.

LANGUAGES

English, Hindi, Gujarati
